

LMusTCL 2017 Sample Paper Answers

There are of course no “correct” answers to LMusTCL questions; and examiners do not always score answers in quite the same ways. However it is possible to provide answers which will show the types of answers that examiners are looking for.

A set of answers is available for NZD25. It contains model answers to the following:

Section A

Question 1 – String Quartet

A series of files show how to work through the quartet and produce a good answer, and analyse what Mozart actually wrote to show elements of his style. The files cover the following::

- Finding keys
- Structure
- Basic chords
- Mozart’s original
- Mozart’s chords
- Mozart’s style

Question 2 – Analyses

The are comments about all five extracts, showing how to analyse them in such a way as to provide the details examiners are looking for.

Section B

The questions in the sample paper are not aimed at the current syllabus. However there are essays about the keyboard genre and the Diabelli Variations which provide model answers to the sorts of questions that are likely to be asked in the paper.
